Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 01 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This is a response to the communication filed on 07/14/2003. Claims 1-26 are pending.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. **Claims 1-7 and 20-22** drawn to a method for identifying structural regularity in logic design, classified in class 716, subclass 001
 - II. **Claims 8-10 and 23-24**, drawn to a method for generating a set of vectors for a logic design, classified in class 716, subclass 001.
 - III. **Claims 11-16 and 26**, drawn to a method of generating a layout for a logic design using vectors, classified in class 716, subclass 001.
 - IV. **Claims 17-19 and 25** drawn to a machine-readable media with a functional regularity extraction, a structural regularity extraction, and a floor planning components, classified in class 716, subclass 001.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions listed as Groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I-IV have separate utility. Invention I uses a method for identifying structural regularity in logic design, invention II uses a method for generating a set of vectors for a logic design, invention III uses a method of generating a layout for a logic design using vectors, and invention IV uses a machine-readable media with a functional regularity extraction, a structural regularity extraction, and a floor planning components. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I-IV is distinct, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Ann M. McCrackin (42858) on November 28, 2005, to request an oral election to the above restriction requirement but did not result in an election being made.

Art Unit: 2825

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuyen To whose telephone number is (571) 272-8319. The examiner can normally be reached on 9:00am-5:00pm.
